

SUPPLEMENTARY DATA

Supplementary Table 1. Main oenological parameters analysed in the ‘Touriga Nacional’ cv. wines: pH, total acidity, tartaric acid content and alcoholic degree. The results are expressed as mean \pm standard deviation. Significant differences were considered for $p < 0.05$, more specifically for *** $p < 0.001$, ** $p < 0.01$ and * $p < 0.05$. The absence of superscript indicates no significant difference between treatments, according to the one-way factorial ANOVA.
