SUPPLEMENTARY DATA

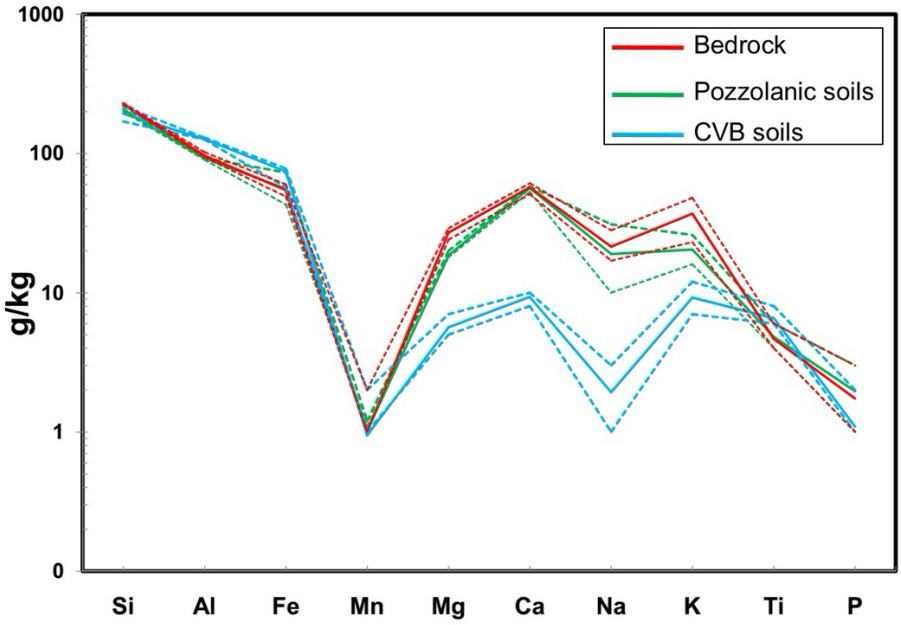

Figure S1. Average bulk compositions of the bedrock (A1 in Table 3), pozzolanic soils (B2 in Table 3), and CVB soils (B3 in Table 3). The dashed lines represent the maximum and minimum values relative to the average values reported in Table 3.

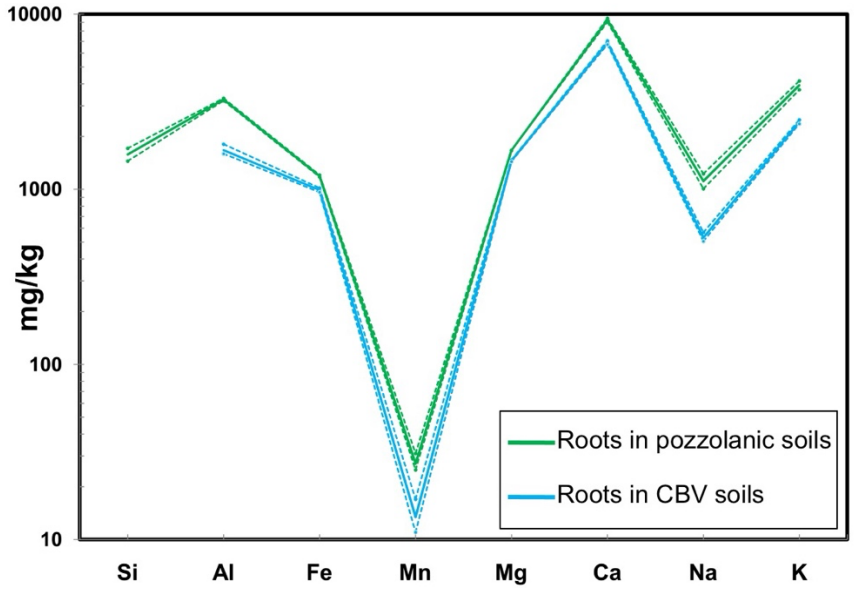

Figure S2. Average bulk compositions of root growth in CVB (R1 in Table 5) and pozzolanic soils (R1 in Table 5). The dashed lines represent the maximum and minimum values relative to the average values reported in Table 5.
