SUPPLEMENTARY DATA

Figure S1. Daily minimum and maximum temperatures (°C) at study site between 2019 and 2023. Missing data points in winter of 2021. The solid black line indicates 40 °C, when the photosynthesis apparatus begins to break down. The dashed black line indicates –24 °C, the cold hardiness threshold of 'Chardonnay' buds.

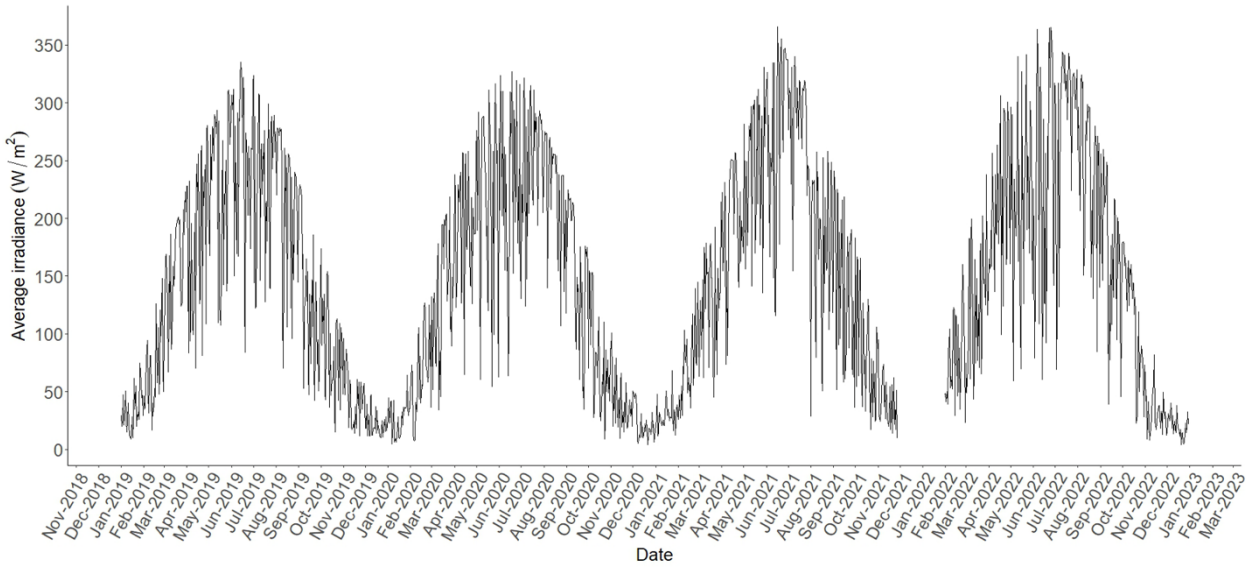

Figure S2. Daily average irradiance (W/m^2) received on the soil surface at study site between 2019 and 2023 measured using a pyranometer. Missing data points in winter of 2021.
